

A Frequency Monitoring Code (FMC) is a unique code which shows radar equipped air traffic control units that you are monitoring a specific frequency.

Before selecting an FMC, you should ensure that you are operating within the FMC area designated for the appropriate Air Traffic Service. The appropriate frequency should then be selected before entering the FMC into the transponder.

You must remain outside controlled and other notified airspace and are not in receipt of an Air Traffic Service.

Aberdeen FMC Area

Aircraft operating outside controlled airspace and not utilising the LARS provided by Lossie Radar or Leuchars Radar, but within the area shown overleaf are encouraged to monitor Aberdeen Radar on 119.055 MHz and select SSR code 4270.

Aberdeen Radar **119.055 MHz**
Frequency Monitoring Code **4270**
